Kansas Special Education Attrition Report 2015-16

Kylie Stewart, PhD

April 2017

Acknowledgements

This report is completed with the assistance of Sarah Vanderpool and Kerry Haag at the Kansas State Department of Education (KSDE) who assists in obtaining the data each year. Additionally, historical data compiled from 1983 to 2010 by Paul McNabb is critical in identifying trends in current attrition rates. This report is submitted to the Student Support Services section of KSDE and supported through a contract with the Greenbush Southeast Kansas Education Service Center, Mike Bodensteiner, Director, and Julie Wilson, coordinator of the project. Johnna McColm of Greenbush (SEKESC) conducted the editor review.

Kansas Special Education Personnel Attrition Rates of Personnel Employed During the 2015-16 School Year Who Did Not Return for the 2016-17 School Year

This report was developed through data analysis of Kansas special education personnel employment during the 2015-16 and 2016-17 school year. The Kansas State Department of Education (KSDE) provides data to this study each year, which is collected from the school districts in Kansas that employ special education personnel. The data is used in this report to identify personnel who have left the field of special education and a specific school district while KSDE uses this data for financial reimbursement purposes. A combination of pivot tables and formulas were conducted in Microsoft Excel, and compared to previous years reports, to examine trends in special education personnel attrition. All personnel numbers reported represent a headcount of personnel rather than an FTE count. Below is a summary of select findings followed by detailed tables in each evaluated area.

Selected Findings

Table 1

Table 1 identifies the attrition rates for all certified special education personnel for each school year from 1976-77 through 2015-16. At the beginning of the 2016-17 school year, 1209 of the 8,931 personnel employed during the 2015-16 school year did not return to a special education position in Kansas. This represented an attrition rate of 13.5%, higher than the previous year of 12.7%. This continues to be higher than the 12.8% national average for teacher attrition, which has not historically been the case in Kansas until 2014.

Table 2

Table 2 identifies the attrition rates for the 2015-16 school year for the 36 different categories of special education personnel. Categories containing less than 50 personnel employed should be considered cautiously due to the low sample size, which would allow for broad fluctuations in the attrition rates when small personnel changes occur. The largest teaching categories had the following attrition rates:

- Mental Retardation, 16.1%
- Early Childhood, 12.2%
- Behavior Disorder, 13.8%
- Interrelated, 13.3%
- Learning Disability, 13.3%
- Gifted, 14.4%

The largest related services categories had the following attrition rates:

- Nurses, 15%
- Social Worker, 13.3%
- Occupational Therapy, 10.6%

- Speech/Language, 13.9%
- School Psychologist, 15.1%

Long-term trends in these individual categories can be examined in Tables 11 to 16.

Tables 3 and 4

Tables 3 and 4 represent two overarching categories of teaching personnel vs. related service personnel. Teaching personnel had an overall attrition rate of 13.6% in 2015-16, which represented a continued increase in attrition and resulting in attrition higher than the national average for the first time. There were a number of categories with attrition changes worth noting. Interrelated experienced an attrition rate higher than the national average at 13.3% for the third year in a row, which was an increase from 9% in 2012-13. Teachers under the category Mental Retardation had a significant increase from 11% in 2014-15 to 16.1% in 2015-16. Additionally, Infant/Toddler experienced a significant increase, as well, from 5% attrition in 2014-15 to 14.2% in 2015-16.

Related services experienced a slight increase in total personnel from 3,516 in 2014-15 to 3,715 in 2015-16. This resulted in a slight increase in the attrition rate from 12.2% in 2014-15 to 13.4% in 2015-16. Speech/Language continued to experience an increase in attrition, which has been trending up for the last four years, including 12% in 2014-15 to 13.9% in 2015-16. Additionally, School Psychologists experienced a significant increase from 10% in 2014-15 to 15.1% in 2015-16.

Table 5

Table 5 displays a historical summary of personnel attrition by category from 1976-77 to 2015-16. Categories not currently represented at the state level were removed from the report. Those categories include, but not limited to: Educable MR, Trainable MR, Interrelated LD/EMR, Interrelated LD/EMR/BD. From 1976-77 to present day, school districts have employed 224,852 in the remaining categories and experienced an attrition rate of 10.67% below the national average of 12.8%.

Table 6

Table 6 examines the difference in attrition rates for school districts by size. Large districts are defined as those who employ 100 or more personnel, medium districts employ between 11 to 99 personnel, and small districts are those who employ fewer than 11 people in special education positions. The term 'district' in this table is a broad term referring to school districts, cooperatives, inter-locals, and other types of administrative arrangements. Large districts experienced a slight increase in attrition from 12.2% to 13.6%. Medium districts experienced no change in attrition rates and continued to result in 13.7% attrition. Finally, small districts experienced a significant decrease in attrition from 15.2% to 9.4%.

Table 7

Table 7 identifies the difference in attrition rates from rural and urban districts. An urban district is located in one of the following counties: Johnson, Sedgwick, Shawnee, and Wyandotte. Twenty-five districts were identified as urban, and eighty-three districts were identified as rural. There was a slight

increase in attrition rates for rural districts with 12.2% to 13% respectively. Urban districts experienced a slight increase in attrition rates from 13.2% to 14.2%.

Table 8

Table 8 examines the attrition rates of school districts by the type of administrative plan they are operating under. Cooperatives continued to experienced a significant increase in attrition that began in 2012-13 with 9.5% attrition to 14.2% attrition in 2015-16. Additionally, school districts experienced a slight increase from 13.2 % to 13.4% in 2015-16. The administrative plans described as other had a slight decrease from 15% in 2014-15 to 13.8% in 2015-16.

Table 9

Table 9 identifies the attrition rates by geographical region. These regions and a corresponding map can be examined in Appendix 2 of this report. The attrition rates in the region ranged from a high of 14.6% in the Southwest region to a low of 11.6% in the Northwest. The Sedgwick County region experienced the most significant change in an increase from 10.9% to 13.2% attrition rate in 2015-16 returning to an attrition percentage closer to historical averages after a low year in 2014-15 with 10.9%. Wyandotte and Johnson Counties continued to have an attrition rate higher than the national average with 14.1% in 2015-16.

Table 10

Table 10 examines the attrition rates by grade level assignment. Data reported by school districts contained both the lowest grade level and the highest-grade level personnel were responsible for. This data was combined to place personnel in a category of preschool, elementary, middle, secondary, or all. Middle level personnel experienced the highest decrease from 15.4% to 11.6%. Secondary increased from 12.2% to 14.1%, while those who taught all grade levels increased from 11% to 13.4%. Preschool and elementary attrition remained mostly unchanged.

Table 11, 12, 13, 14, 15, and 16

Tables 11 thru 16 summarized the annual attrition data for 17 of the most employed personnel categories. These tables allow for a unique perspective on the philosophical changes in how services are provided by examining changes in particular positions. For example, there was growth in physical therapy and occupational therapy personnel, but overall there was a decline on most personnel categories in 2015-16. There was a significant increase in attrition rate in the areas of severe/multiple disabilities from 8% to 17.1% and school psychologist 10% to 15.1%. School psychologists experienced the largest attrition rate since 1984. Special education administrators met a historical high of 16.3% attrition in 2015-16, an increase of 2.3% from 2014-15 (14.0%).

Tables 17, 18, 19, and 20

Tables 17 thru 20 report attrition rates for individual school districts rather than individual personnel. Districts employing less than 12 personnel have been removed due to the lack of sufficient sample size. The attrition rate ranges from 27.3% to 0%. Four years of data has now been compiled on school

districts to be able to identify trends in districts where attrition is historically low. This data will be included in the report once 5 years of attrition data is collected.

Summary

The purpose of this report is to analyze exit attrition in the state of Kansas. Exit attrition is a significant issue for schools and requires yearly examination to identify trends and patterns to attrition in the state either in areas of specific categories, types of administrative plans, areas of the state, and sizes of the school districts. In 2014-15 the state experienced, for the first time attrition higher than the national average, and in 2015-16 this trend continued with overall attrition increasing from 13% to 13.5%. Moreover, specific categories of positions, such as school psychologist, experienced a significant increase in attrition at 15.1% and severe/multiple disabilities jumping to 17.1%. In the 2014-15 attrition report, it was noted that it would be important to examine the attrition data from 2015-16 to determine if it was simply an anomaly that attrition seemed to increase across the board in 2014-15. Data in this report conveys that this was not an anomaly but a new trajectory that attrition of special education personnel increased across the state in subsequent years. This data does not allow us to determine the cause of the attrition increase, and many factors can effect it including more personnel reaching retirement age and the state of school funding in Kansas. It will be critical to determine if attrition continues to rise in 2016-17 as the state begins to feel the effects of experienced teachers leaving the field.
